

Project Development Phase Functional & Performance Testing

Date	01 Oct 2026
Team ID	SWTID-2026-3488
Project Name	Import Data using Transform Maps (Spreadsheet)

Performance Testing:

S.No.	Parameter	Values	Screenshot
1	Model Summary	Rows in spreadsheet: 8 Rows loaded into Import Set table: 8 Inserted: 6 Updated: 2 Ignored: 0 Skipped: 0 Error:0	
2	Accuracy	Records imported correctly = $(\text{Inserted} + \text{Updated}) \div \text{Total rows} \times 100 = 100\%$ Duplicate records created: 0	
3	Field Mapping Check	Fields mapped: Employee ID, Name, Email, Department, Location (5 of 5 mapped correctly) Coalesce field: Employee ID	

Test Scenarios & Results

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	Source file validation (format & headers)	Open the spreadsheet; check headers and file type (.xlsx / .csv)	Headers match Employee ID, Name, Email, Department, Location; no blank rows	Headers matched Employee ID, Name, Email, Department, Location; no blank rows	Pass
FT-02	Load data into Import Set	System Import Sets > Load Data > upload file	Import Set table is created and all rows are loaded	Load data into Import Set 8 rows loaded successfully into Import Set table	pass

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-03	Field mapping	Open Transform Map > Field Maps; map each source field to a target field	All five fields map to the correct target fields	Field mapping All 5 fields mapped correctly	Pass
FT-04	Coalesce / duplicate prevention	Run the transform twice with the same file	Second run updates existing records; no duplicates are created	Coalesce / duplicate prevention 6 records inserted and 2 existing records updated; no duplicates created	Pass
FT-05	Invalid / blank data handling	Add a row with a blank Employee ID or invalid email and run the transform	Row is ignored / flagged as error and reason is visible in Transform History	Invalid / blank data handling Not tested	N/A
FT-06	Run transform	Click Transform on the Import Set	Transform completes with status Complete	Run transform Transform completed successful	Pass
FT-07	Target data verification	Open the target table list view	Records match the spreadsheet values	Target data verification Target records matched the spreadsheet values	Pass
